Steve Belliveau

Getting Excited About Science

Human Gyroscope...Disappearing Ink...Frozen Balloons... Flying Objects! These are just a few of the entertaining demonstrations that Steve Belliveau uses to help kids discover their world in new and creative ways. All shows also include music, comedy and audience participation.

"Accompanied by a steady chorus of oohs and aahs and an occasional 'awesome.'"

CHICAGO TRIBUNE

"We never knew learning about scientific principles could be so much fun!"

GETTING EXCITED ABOUT SCIENCE

Tension mounts: Will the needles break the balloon?

Getting Excited About Science

Steve turns a teacher into a human Gyroscope!

Steve electrifies an audience member.

NEW Science @ Sea Show, Famous Inventions Show, Video Microscope projected on Big 7 Foot Screen.

Steve Belliveau delightfully combines his university studies (B.S. in Engineering Applied Science) with his skill as a magician to present a general science show that captivates students and teachers alike. He has been recognized by professional teaching organizations, the Chicago Tribune and WGN TV as a leader in this field.

At last, a science show that everyone can not only see, but understand and enjoy. The aim of Steve's show is to inspire students to get involved in science themselves. Using dramatic demonstrations, easy to see equipment, humor, magic, music, and audience participation, he brings down to earth basic scientific ideas about air/water pressure, magnetism & electricity, friction, chemistry, simple machines, conservation of energy, sound, color and temperature-molecule reactions.

Steve Belliveau's "Getting Excited About Science Show" is the perfect blend of teaching and entertainment that will be talked about long after they see it.

Shows designed to be age/grade appropriate
Teacher's guide and follow-up notes also available
Workshops for students and teachers available

Frozen fun with liquid nitrogen

Sailing across the room on a Hubacraft!

Getting Excited About Science

GETTING EXCITED ABOUT SCIENCE shows offered:

Forces & Motion
Newton's 3 laws on Motion
Potential & Kinetic Energy
Hovercraft
Giant Pendulum
Human Gyroscope

Chemistry ABC's
Acids – Bases – Salts
Matter
Electrolysis, Distillation & Filtration
Make Polymers and Rubber
Liquid Nitrogen

Sensational Science
General Science Show
Perfect for students and adults
Surprising Props
Large Scale Demonstrations

All Things Electric
Sources of Electricity
Static Generators
Current vs. Voltage
DC vs. AC
Magnets & Induction
Tesla Coil

Astronomy & Space
History
Designs of Telescopes
Space Travel Concepts
Rocket Technology
Space Station Experiments

Primary Science
Magnetism
Sound
Light/Color
Matter & Weather

Machines & Inventions
Simple Machines including:
Pulleys – Giant Screw – Giant Lever
Draw Bridge & Lock and Dam
Electric Generator
Steam Engine
Airplane – Flight

Science Fair Primer
Scientific Method in a fun manner
Demonstration vs. Experiment
Simple Chemistry
General Science Show
Large Scale Demonstrations

Science Detective
Audience gets to solve mysteries
using scientific skills
Magic
Designed for k-3

All Shows are adaptable to any event.
